8081		Danger Point							

(A)

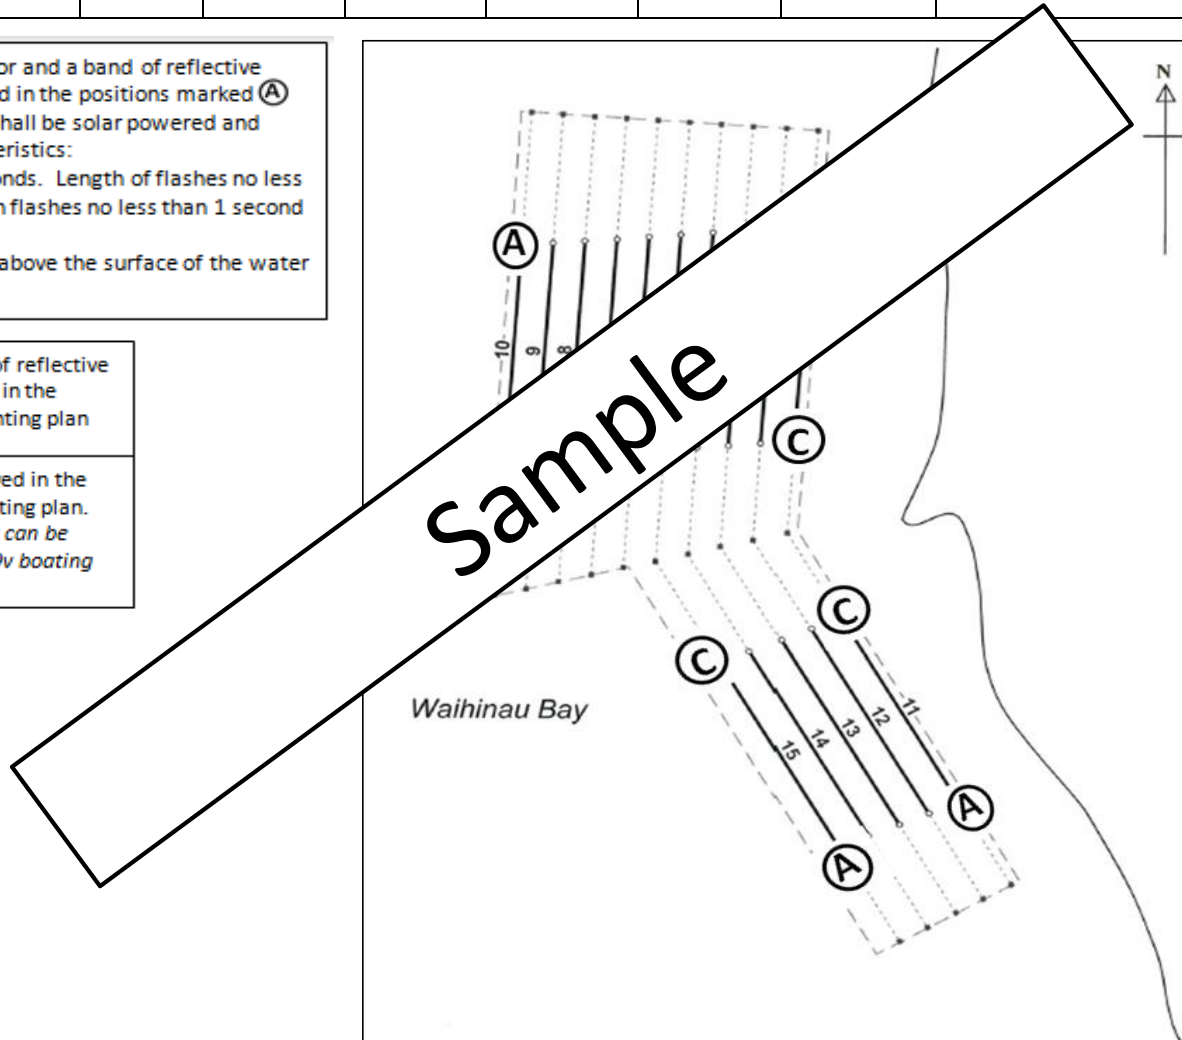

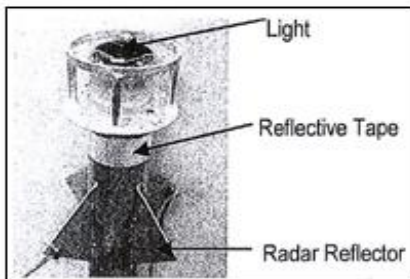

That a yellow light, radar reflector and a band of reflective tape 50mm in width be displayed in the positions marked (A) on the lighting plan. The lights shall be solar powered and shall have the following characteristics:
Flash: Flashing (5) every 20 seconds. Length of flashes no less than 1 second. Interval between flashes no less than 1 second
Range: At least 1 nautical mile
Height: Greater than 1.0 metre above the surface of the water

(B)

That radar reflectors and a band of reflective tape 50mm in width be displayed in the positions marked (B) on the lighting plan

(C)

That a reflective device be displayed in the positions marked (C) on the lighting plan. *A reflective device is a device that can be seen from 50m using a standard 9v boating torch*

The Owner of the site is responsible for ensuring compliance with lighting plans associated with each consent
